Apps for charging your EV

(if Tesla charging isn't an option)

- [ChargePoint](#)
- [Electrify America](#)
- [Evgo](#)
- [Volta Charging](#)
- [Blink Charging Mobile App](#)
- [Shell Recharge Solutions](#)

ChargePoint

FIND. CHARGE. PAY. GO.

Find available charging stations

Discover real-time charging station details and more

Track all your charging in one place

Maximize your EV charging with unique widgets

Receive convenient notifications and reminders

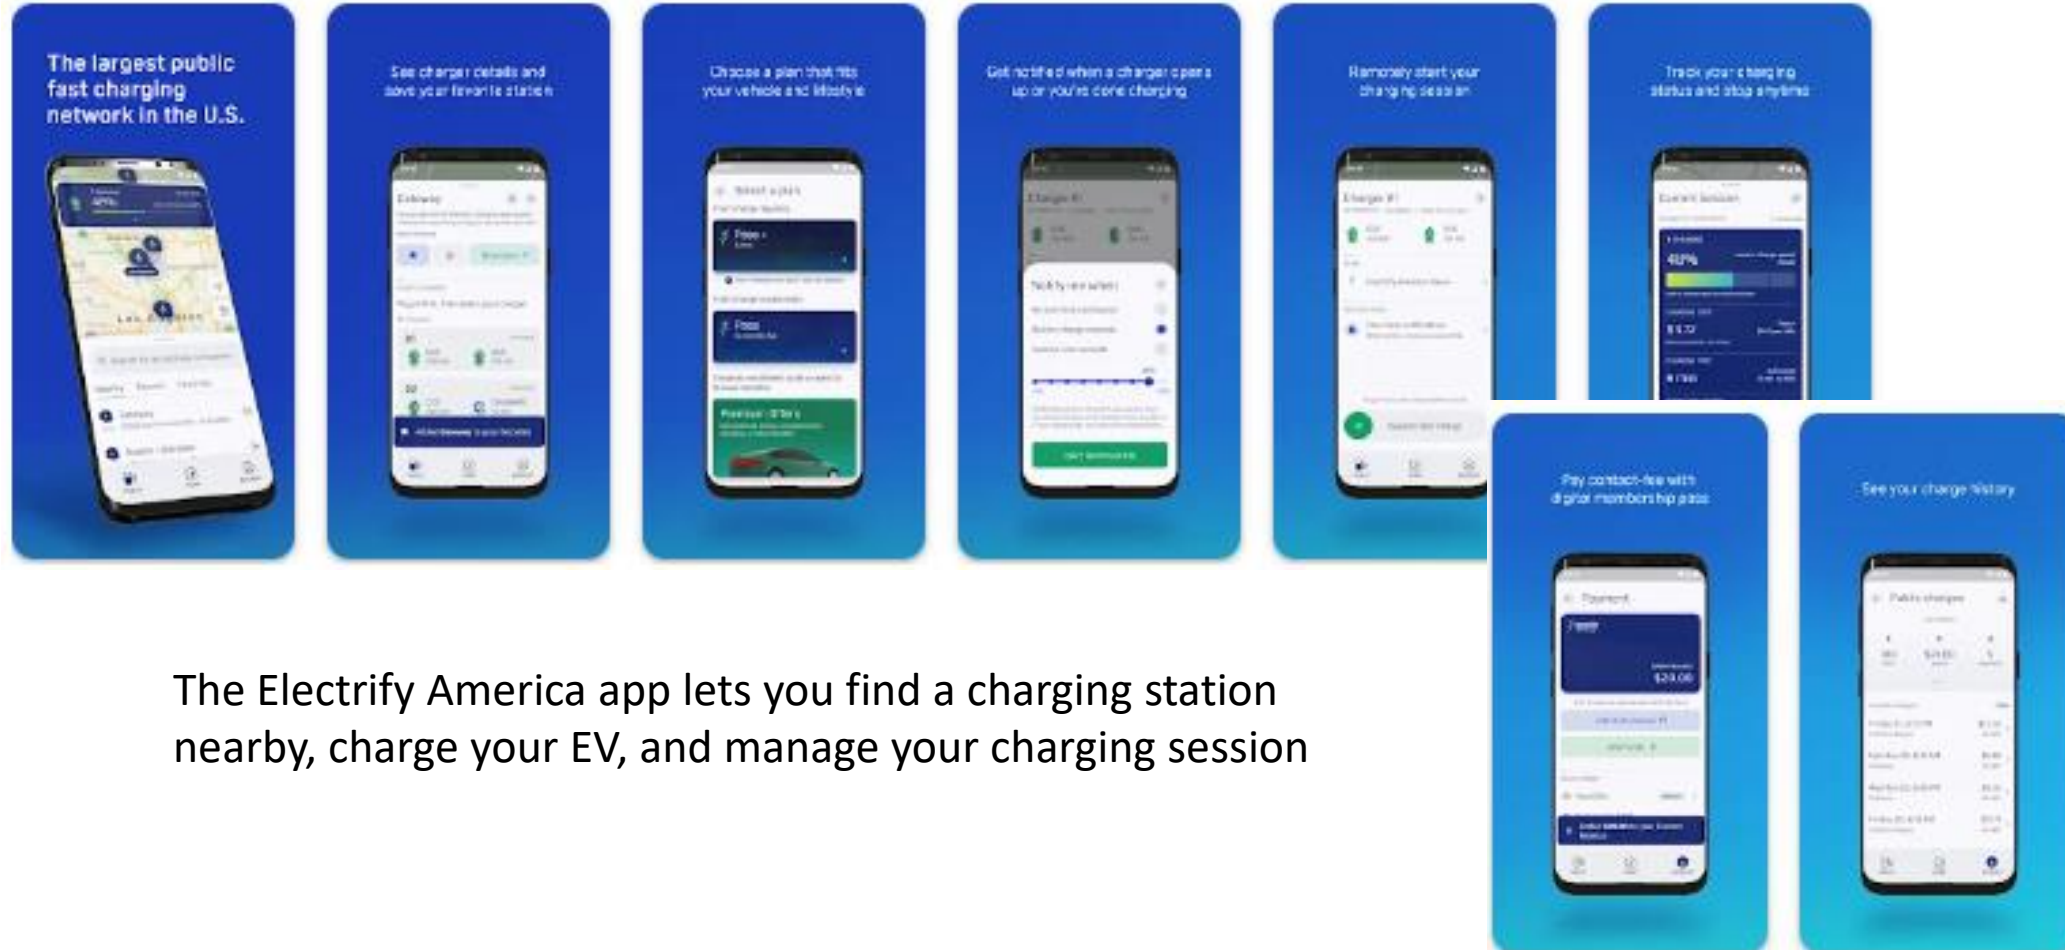

Start charging instantly

Locate available stations with Android Auto

Control your home charging

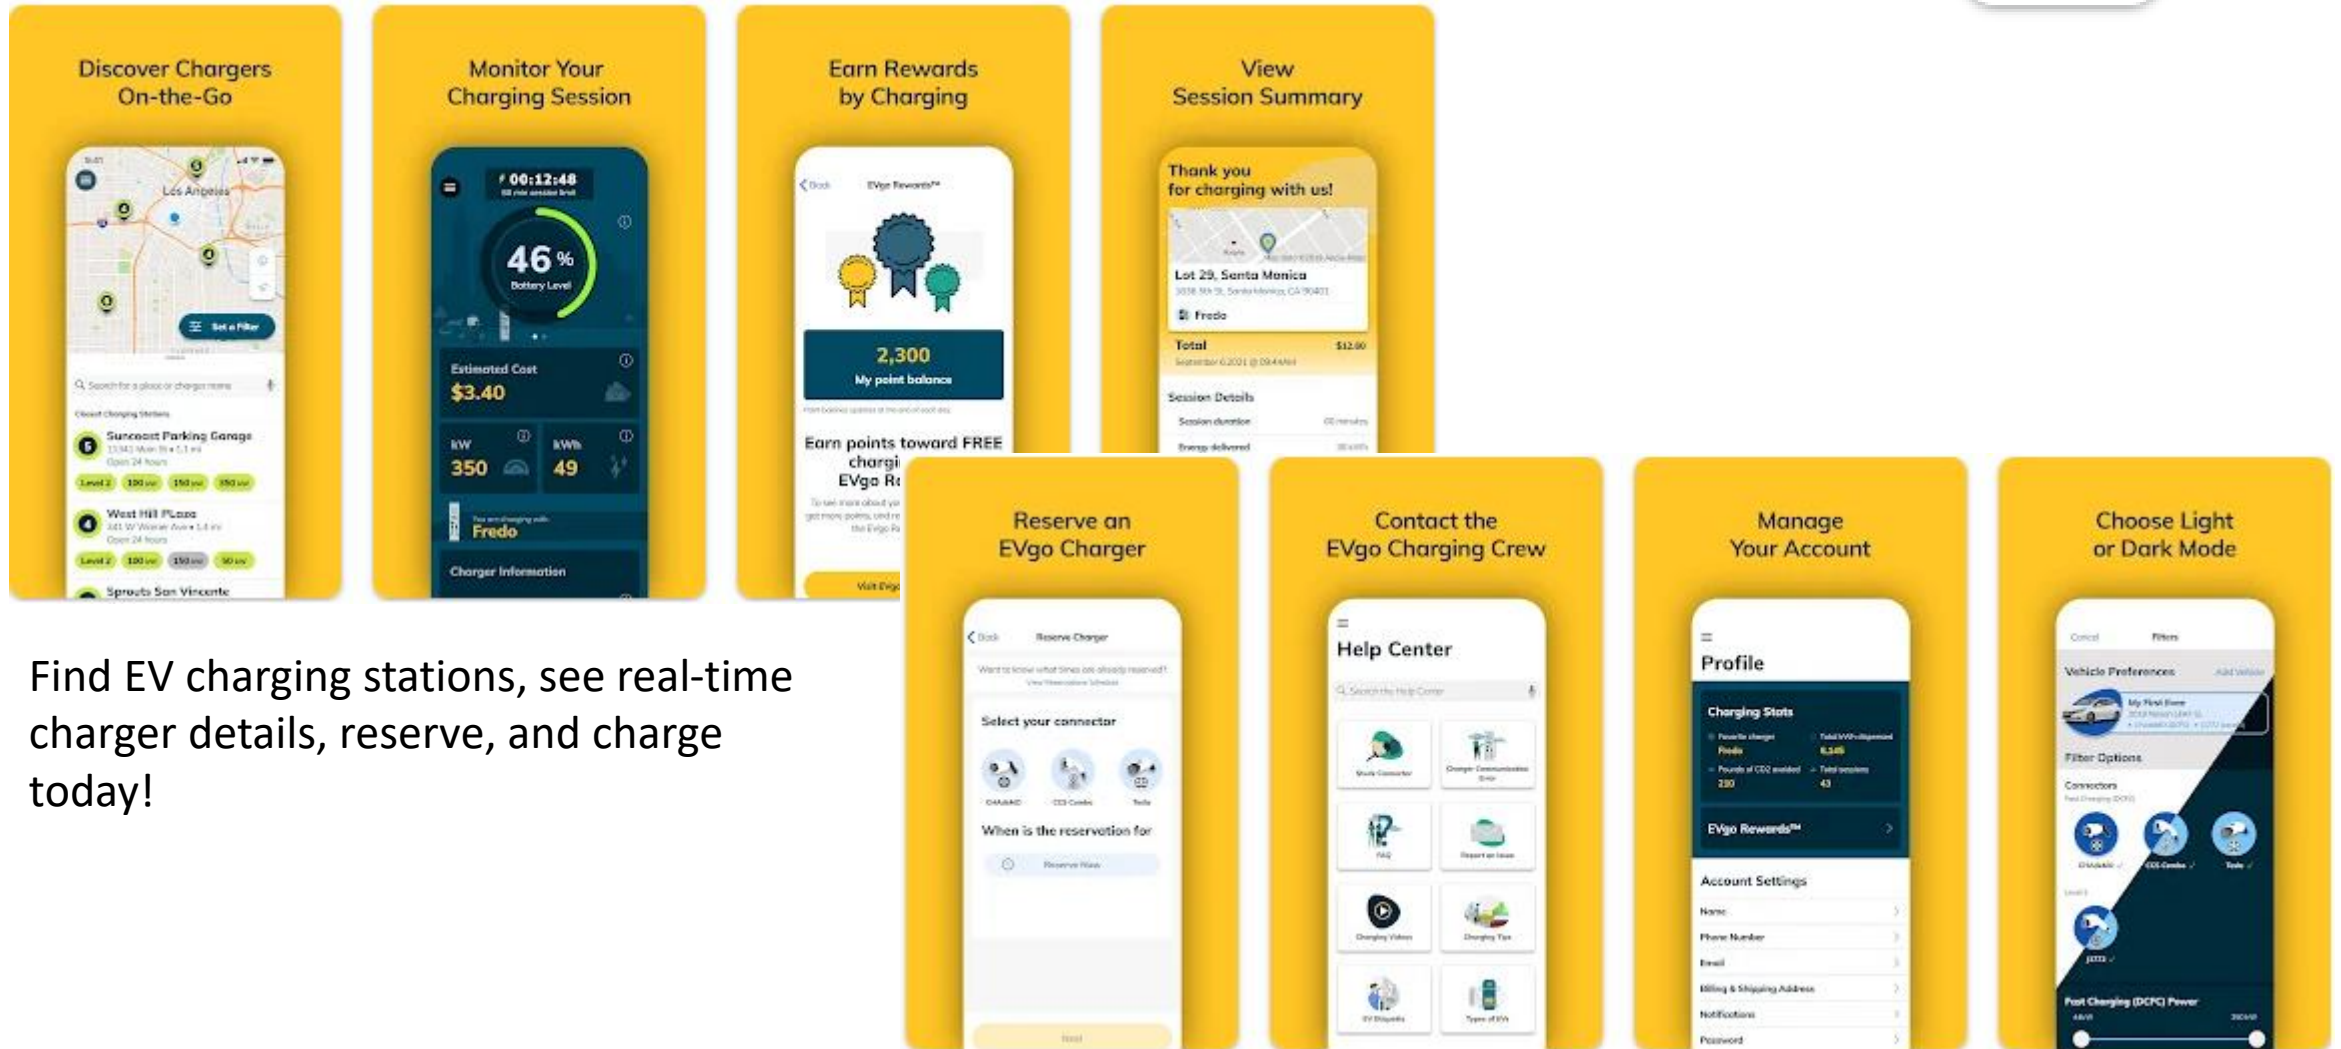

The ChargePoint app seamlessly connects drivers to the world's largest EV charging network with hundreds of thousands of available stations and roaming partners to choose from.

Electrify America

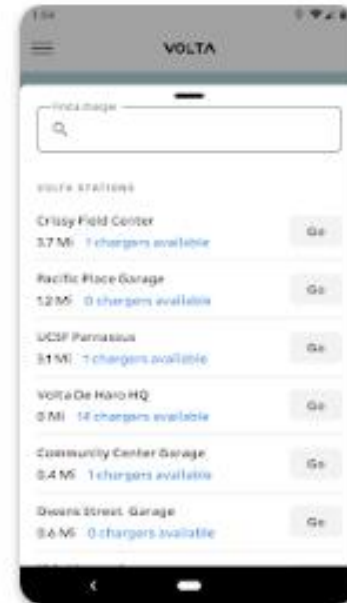

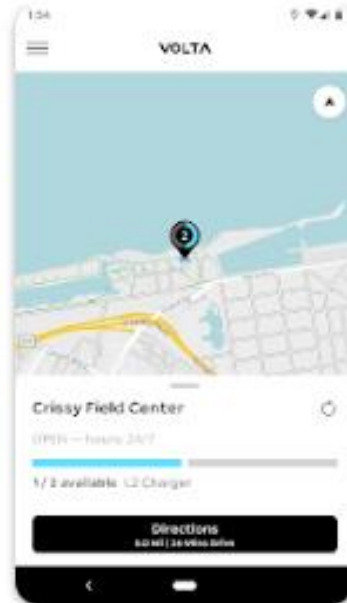

The Electrify America app lets you find a charging station nearby, charge your EV, and manage your charging session

EVgo

Find EV charging stations, see real-time charger details, reserve, and charge today!

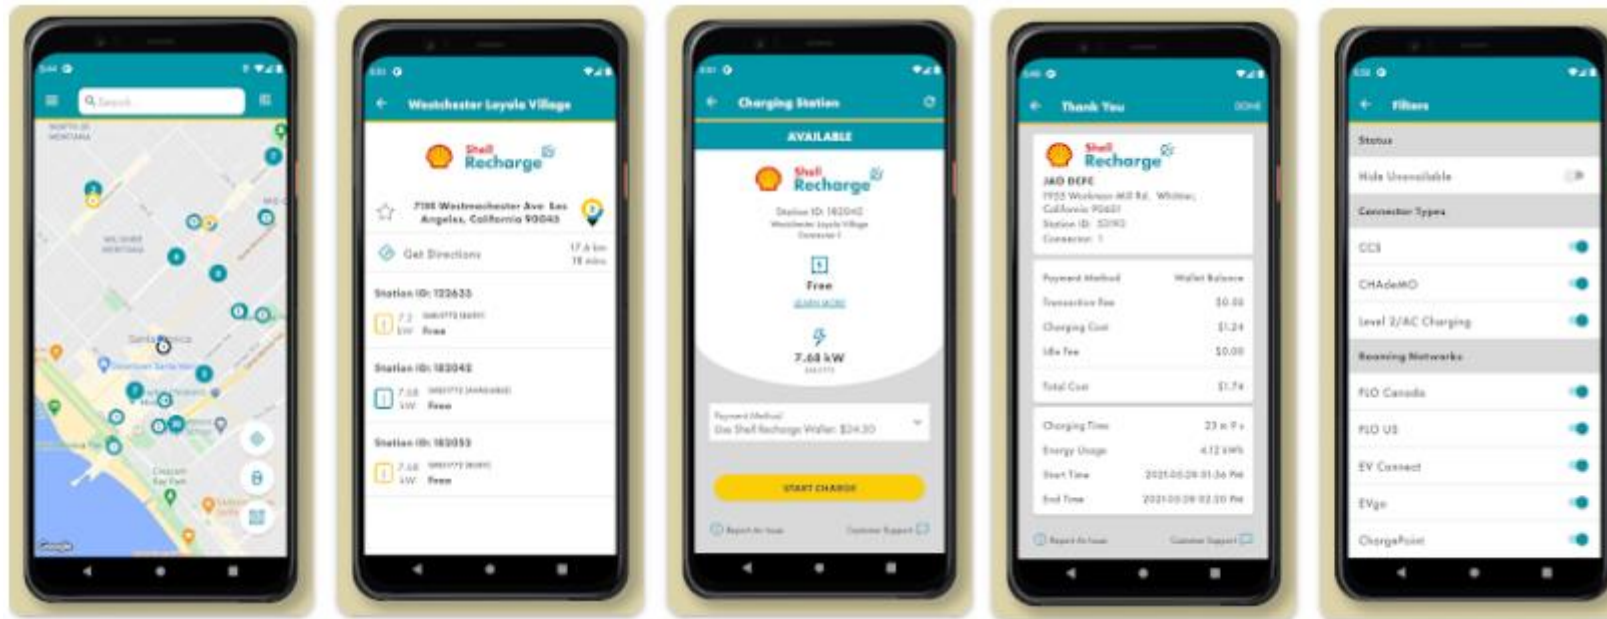

Volta Charging

Blink Charging Mobile App

Shell Recharge Solutions

Shell Recharge Solutions is unlocking the future of mobility.

And a useful website...

RecurrentAuto.com

Vehicle Reconnect

We've successfully migrated our connection with your vehicle to the new Tesla API!

My Expected Range

263 - 264 miles

EPA: 272 miles [↗](#)

Range Score compares a vehicle's current expected range to what was normal when new.

[Learn more →](#)

My Range in 3 Years

249 - 250 miles

Over time, your battery will age and your expected range may change. Taking good care of your EV can have the long-term benefit of slowing these changes.

[Learn more →](#)

Estimated Market Value

\$26,801

\$34,459

Offers for your vehicle will likely be in this range, but depend on exact condition

Change from last month: -4.58%

[SELL WITH RECURRENT](#)

Recurrent's EV experts will personally help you get offers from knowledgeable EV buyers.

[Learn more →](#)

Real-World Range

176 - 247 miles

We use thousands of observations from other Tesla Model 3 comparables to predict your most likely driving distance between full charges in your local weather conditions.

[Learn more →](#)

My Savings

In its life, your EV has saved about the same as 185.42 gallons of gas
